

Solar Calculators

Below is a sampling of solar PV calculators available on-line. It is recommended that you contact [Utah Solar Installers](#) to get quotes for your solar system and based on your customized system and technology.

To determine how much energy you currently use, you will need a year's worth of utility bills (gas and electric). You can contact your utility provider to get copies.

- [Solar Advisor Model](#) – developed by the National Renewable Energy Laboratory and Sandia National Laboratory
- [PV Watts](#) - developed by the National Renewable Energy Laboratory
- [Cooler Planet](#) –A Seattle-based company (Please NOTE: the Solar Salt Lake Project does endorse this company or its services/products)

If you are interested in getting a better understanding of your carbon footprint and other ways to reduce your home/business energy consumption, here are some additional tools and resources:

- [Green Choices – Utah.gov](#)
- [Carbon Footprint Calculator](#)
- [Clean Air Trust](#)
