

Solar Education and Installer Courses

If you are interested in learning more about solar or becoming an installer, or if you are a professional seeking to understand solar in your sector, check out the available solar education courses and resources available:

- [Salt Lake Community College Green Academy](#) – Solar PV Installer Courses
- [Department of Labor and Department of Workforce Services State Energy Sector Partnership Initiative](#) - designed to teach workers the skills required in emerging industries, including energy efficiency and renewable energy
- [Rocky Mountain Regional Provider of Solar Instructor Training](#)
- [Solar Energy International](#) – workshops for all levels and all renewable energy technologies
- [North American Board of Certified Energy Practitioners](#) – certification and training for solar installers
- [AEE Solar Trainings](#)

A well-trained solar workforce is a critical component to any successful solar program and long-term market. Qualified and experienced installers help confirm the legitimacy and benefits of solar technologies. As the demand for solar continues to grow, so too does the need for experienced building and code officials who enforce safe, high-quality solar installations. Credit: Dennis Schroeder, NREL

To learn more about the requirements to become a licensed solar PV or solar thermal installer in Utah, contact the [Division of Occupational and Professional Licensing](#). The applicable solar licenses are as follows:

- S202 – Solar PV (electric)
- S215 – Solar Thermal

Additional solar education and resources:

- [Solar America Board for Codes & Standards](#) – geared for building & code officials, local governments, advocates, and solar industry professionals
- [Solar Electric Power Association](#) - geared for utilities
- [Solar Energy Industries Association](#) – for solar industry professionals
- [American Solar Energy Association](#) –for solar industry professionals and enthusiasts
- [Solar Today Magazine](#) – solar industry publication
- [Utah Solar Energy Association](#) – Utah’s solar industry association
- [Utah Clean Energy](#) – non-profit, advocacy, policy, and regulatory organization
- [Database for State Incentives for Renewables & Efficiency](#) – solar incentives & policies
- [Utah State Energy Program](#) – Utah’s energy office
