CLIMATE SOLUTIONS FOR A **BRIGHTER FUTURE**

UTAH CLEAN ENERGY

U T A H C L E A N E N E R G Y
2 0 2 2 A N N U A L R E P O R T

“Climate change is the single greatest threat to a sustainable future but, at the same time, addressing the climate challenge presents a golden opportunity to promote prosperity, security and a brighter future for all.”

-Ban Ki-Moon, Former Secretary-General of UN

UTAH CLEAN ENERGY

1014 2nd Avenue, Salt Lake City, UT 84103

Utah Clean Energy is a 501(c)(3) nonprofit under EIN: 37-1438788.
All donations are tax deductible.

CLIMATE CHANGE IS BOTH OUR GREATEST CHALLENGE AND GREATEST OPPORTUNITY

By meeting the climate challenge, we transform our lives, societies, and institutions for the better. It has never been more urgent to take bold action, and the momentum behind climate solutions continues to build. As this confluence of progress mounts, Utah Clean Energy is at the forefront, advancing some of Utah's most innovative clean energy and climate solutions in the west.

Thank you to everyone who continues to donate, volunteer, and use your voice for smart climate solutions.

If I've learned anything in the 20+ years since founding Utah Clean Energy, it is that what might seem impossible *is possible* with focus, determination, and an understanding of our shared values. We know what we need to do to address climate change, and we are on the precipice of an energy renaissance that will be the blueprint for a better world. A world powered by clean energy, families living in comfortable, healthy, emission-free homes, our vehicles with no tailpipes, breathing air that is clean, and drinking water that is available and fresh. However, following the latest Intergovernmental Panel on Climate Change report, we also know we need to up our game and significantly accelerate the pace of change.

One key to achieving all this is building the political will and changing the narrative. The idea that addressing climate change will hurt our economy, create unreliable energy, or give us less of the things we love, is a false narrative. We don't have to choose between a healthy climate and a healthy, vibrant life. In fact, they go hand-in-hand.

Clean energy, storage, zero-emission transportation, and high-performance building technologies are advancing and becoming more accessible by the day. Climate innovation is unleashing new opportunities for jobs and local clean energy development. We have the tools we need for a zero-carbon future, and yet we still must move faster in implementing them. The science is clear: we can no longer afford to delay the rapid deployment of these climate solutions.

I look forward to working with all of you to accelerate the pace of change. This year, let's commit to talking more with our friends, family members, and our policymakers to help them understand that the cost of inaction is immense, and the benefits of climate action are tremendous. It is time to change the narrative and bring more community members, leaders, and policymakers into this vision.

I'm so grateful to be on this journey with you. For the next lap, let's lace up our sneakers and speed up the pace — it's going to take all of us.

Sarah Wright

OUR GRATITUDE TO DEPARTING BOARD MEMBERS

Dennis Haslam, *Owner of DH Consulting & Investments, LLC, Former President, Utah Jazz and Larry H. Miller Enterprises*

Dennis Haslam's tenure on Utah Clean Energy's Board of Directors came to an end last year. Dennis ignited our board with new ideas and visionary leadership. From all of us at Utah Clean Energy, thank you, Dennis, for your many years of dedicated service and thoughtful guidance.

Diane Rosenberg, *Consultant*

Our longtime board member, Diane Rosenberg, also closed out a highly impactful board tenure. Diane brought her years of communications expertise to our team. Her passion for environmental stewardship helped grow our network of climate champions. Thank you, Diane, for your commitment to climate action.

PROJECT SPOTLIGHTS

SHOWING THE WAY TO AFFORDABLE, EMISSION-FREE HOMES IN UTAH

Learn about how these homes were build to be emission free and affordable in this short video.

In 2022, Utah Clean Energy wrapped up a collaboration with Salt Lake City and Goldman Sachs to transform two standard affordable single-family homes into models of emission-free construction. Our project illustrates to builders, developers, and affordable housing providers that it is possible to construct energy-efficient, affordable homes with all-electric equipment instead of appliances that rely on fossil-fuel combustion, such as gas furnaces, water heaters, and ranges. High levels of energy efficiency in addition to efficient all-electric equipment can decrease energy costs for the families, while increasing their comfort, and helping to keep Utah's air clean.

The two homes were specifically built for income-qualified homebuyers, ensuring affordable utility bills, improved indoor air quality and zero pollution emissions. A big thank you to our project partners, Salt Lake City's Housing Stability Division and Goldman Sachs for making this project possible.

ADVANCING AMBITIOUS ENERGY EFFICIENCY POLICY IN UTAH

Updating Utah's energy conservation code for our homes and buildings is no small matter. It is a state-wide policy that impacts the efficiency and emissions of all new homes and buildings in Utah. But we're not here to play small, and the opportunity to slash carbon emissions by an additional 26,000 tons a year is something we just couldn't pass by.

We successfully advocated to Utah's Uniform Building Code Commission to recommend updating Utah's building energy codes to the Utah Legislature. This victory was the result of a year-long effort with dozens of stakeholders, media outreach, and in-depth analysis. At the close of the 2023 Legislative Session, we came away with a big victory when the Utah Legislature voted to approve Utah's commercial energy conservation code.

While this is not the full win we sought, as the residential energy code was not adopted, the commercial code update will improve energy efficiency in our biggest buildings, saving money and reducing emissions for years to come.

THE OPPORTUNITY TO SLASH CARBON EMISSIONS BY AN ADDITIONAL 26,000 TONS A YEAR IS SOMETHING WE JUST COULDN'T PASS BY.

Photo: Appaloosa Solar 1 project in Iron County, Utah developed by rPlus Energies

RENEWABLE ENERGY ON THE RISE ACROSS UTAH

Since our inception, Utah Clean Energy has led Utah's transition to clean, renewable energy. Our expert intervention in complex utility decisions has resulted in thousands of megawatts of new solar and wind projects in Utah, with no end in sight.

What better way to demonstrate Utah's continued move to carbon free renewable energy, than last year's announcement by local renewable energy developer, rPlus Energies, to build the largest solar energy and battery storage system in Utah. When completed, this one project generates enough clean energy to power the equivalent of over 100,000 homes.

Renewable energy projects like this are the direct result of Utah Clean Energy's ongoing expert intervention in PacifiCorp's Integrated Resource Plan (IRP) whereby the utility lays out what combination of energy resources it will use to power its customers. Utah Clean Energy's utility team successfully advocated for larger and faster commitments for new renewable energy, storage, and energy efficiency in the utility's IRP, resulting in this and other clean energy projects on the horizon.

TAKING ACTION ON POLLUTION: GUADALUPE SCHOOL AND FREE WESLEYAN CHURCH OF TONGA IN UTAH

Utah Clean Energy's EmpowerSLC initiative continues to bring energy-saving tools and resources to front-line climate communities that stand to benefit the most. Last year, we partnered with Guadalupe School and Free Wesleyan Church of Tonga in Utah to reduce pollution and save money in Salt Lake City's west side, which experiences some of the worst air quality in Utah.

With support from Intermountain Healthcare, we worked with each organization to implement energy upgrades ranging from LED lightbulb replacements, air sealing, and HVAC replacement. Through these actions, Guadalupe School and Free Wesleyan Church of Tonga in Utah are removing thousands of tons of carbon pollution and saving money on their energy bills. These energy savings can in turn be reinvested into the organization's core mission to serve and engage the community.

Recognizing the opportunity to help families reduce pollution and save money, Guadalupe School worked with Utah Clean Energy to complete home energy efficiency upgrades for students' families. In all, eight families received smart thermostats, LED lightbulb installs, attic insulation, and air sealing. The more we can empower all Utahns with the tools to save energy and money, the more we can turn the tide on climate change.

Congregants of the Free Wesleyan Church Of Tonga In Utah preview the new energy efficient bay lights in their gymnasium

ACCELERATING UTAH'S LEADERSHIP ON CLIMATE SOLUTIONS

Addressing climate change is the blueprint for a prosperous future. We need leaders from all backgrounds and beliefs to understand that our state and our world have everything to gain from taking action on climate: cleaner air and water, energy security, and resiliency, all accompanied by economic prosperity and equality. It is a drumbeat that continues to grow louder and stronger with every signatory of the Utah Climate and Clean Air Compact – now over 180 signatories strong.

Utah leaders are stepping up to make our state a national leader on climate solutions. For example, the Salt Lake Chamber, whose CEO Derek Miller is a Compact signatory, launched a new energy vision called the Salt Lake Chamber's "Business Vision for Utah's Energy Future." The Chamber's strategy marks a major shift in its public position on climate solutions and recognizes the importance of a transition to low-carbon energy resources to help ensure a healthy business climate. And Congressman John Curtis, an inaugural signatory of the Compact, hosted the first Conservative Climate Summit. The event brought together prominent political and industry leaders all exploring the challenges and solutions to climate change. Our focus is to sustain this work so that Utah can lead on climate solutions.

"Utah Clean Energy is taking partisanship out of the mix and making climate change an issue we can all work together on to implement smart and innovative solutions."

- Becky Edwards, Former House of Representatives, State of Utah

CONSERVATION AND PHILANTHROPY

with Tim and Candy Dee

We were delighted to chat with longtime Utah Clean Energy champions, Tim and Candy Dee of the Lawrence T. and Janet T. Dee Foundation about what motivates their support for Utah Clean Energy. Thank you, Tim and Candy, and the Lawrence T. and Janet T. Dee Foundation. We are proud of all we have been able to accomplish together!

WHY IS CONSERVATION WORK IMPORTANT TO YOU AND YOUR FAMILY?

Tim: My dad, through his parent's foundation, was an early supporter of work benefitting conservation and the environment in Utah. Today his early advocacy has become an important part of our family's values and why we focus a portion of the Lawrence T. and Janet T. Dee Foundation's funds on these causes. When Utah Clean Energy began its work, it seemed like a great fit because of the caliber of people on the team. We were really impressed by the impact a small organization with high-level expertise could have on our state.

> "IF WE WANT TO CONTINUE LIVING IN [THE SALT LAKE VALLEY] THERE'S NOTHING MORE IMPORTANT AND URGENT TO SUPPORT THAN ACTIONS TO REDUCE POLLUTION."
>
> - Candy Dee

WHY DO YOU THINK IT'S IMPORTANT TO SUPPORT CLIMATE AND CLEAN AIR WORK?

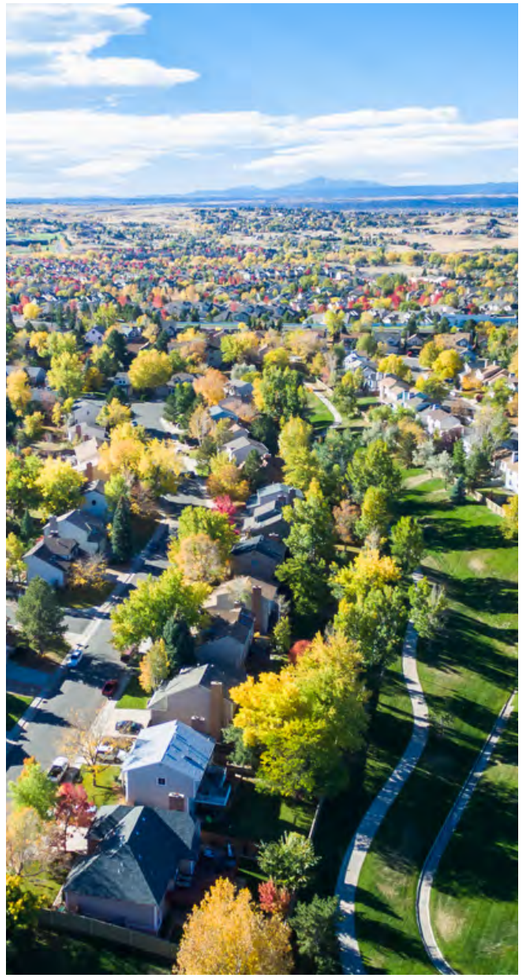

Candy: Every day when I look outside the window and see what the air looks like. Growing up here, I've watched the inversions get more and more severe and now I have grandkids. I worry about what they're going to be breathing. If we want to continue living in Utah and especially here in the Salt Lake Valley, there's nothing more important and urgent to support than actions to reduce pollution.

Tim: Utah Clean Energy, with its expertise and useful website, is a great resource for individuals and businesses to be part of the climate solution. Also, their policy advocacy is invaluable to making lasting change at the state level.

WHAT MOTIVATED YOU TO SUPPORT UTAH CLEAN ENERGY?

Tim: The breadth of Utah Clean Energy's efforts goes beyond promoting residential clean energy, but also to commercial building, policy issues and so much more. Sarah's really been able to focus on the core decarbonization issues and the impact on our state has been comprehensive because of that.

Candy: Utah Clean Energy's collaborative approach, the team that drives the initiatives, and the demonstration Climate Innovation Center all together position Utah Clean Energy to be the climate and clean air leader we need at this critical time. The organization has also influenced us personally to be part of the solution by driving electric cars, putting solar panels on our roof, and more.

AWARDS

WOMEN'S LEADERSHIP CELEBRATION HONORS INSPIRATIONAL UTAHNS

The Sundance Institute and Zions Bank honored five Utah women who are leading the way in business, politics, social justice, victim advocacy, and the environment. Utah Clean Energy's CEO, Sarah Wright, was among the honorees for her leadership on climate issues in Utah.

Sundance Women's Leadership Honoree: Sarah Wright

"It's my honor to recognize this incredible group of talented women whose accomplishments span our state and beyond."

- Scott Anderson, President & CEO, Zions Bank

UTAH BUSINESS MAGAZINE, GREEN BUSINESS AWARD FOR SOCIAL IMPACT

In recognition of Utah Clean Energy's 20th anniversary, *Utah Business* magazine awarded us with one of their coveted Green Business Awards in the category of Social Impact. We were delighted to be included in such a prestigious group of leaders including rPlus Energies, The Front Climbing Club, Goal Zero, and Zions Bank.
